PROFESSIONAL SUMMARY

Creative and tech-driven professional with experience in digital tools, web development, ICT support, and online platform management. Skilled in supporting digital communication, website content updates, branding-related tasks, and technology-driven business solutions. Strong understanding of online user behavior, content presentation, digital systems, and customer-focused communication. Adept at learning fast, working with teams, and using technology to improve visibility, engagement, and overall business performance. Seeking to contribute my creativity, digital skills, and technical problem-solving ability in a multifaceted technology or digital marketing role.

CORE COMPETENCIES

Digital Marketing & E-Commerce: Social Media Content Support, Branding & Online Presence, Website Content Management, Copywriting, Promotional Messaging, Campaign Coordination, and User Behavior Insights.

ICT Support & Networks: Linux & Windows OS, LAN/VLAN routing, Hardware Maintenance, System Security/Antivirus deployments, Backup Protocols, and Troubleshooting Documentation (SOPs).

Operations & Logistics: Stock accountability, FMCG Distribution Management Systems (DMS), asset tracking, and loading/receiving verification logs.

Full-Stack Development: HTML5, CSS3, JavaScript (React, Next.js, Node.js, Express), Python (Django, Flask), Java, and SEO-friendly Web Structuring.

Data Management & Analytics: Database Administration (PostgreSQL, MySQL, JDBC), Google Workspace, Advanced Microsoft Excel, Data Entry, and Search Console indexing analytics.

Soft Skills: Team Supervision, Technical Instruction, Customer Engagement, Attention to Detail, and Problem-Solving under tight timelines.

WORK EXPERIENCE

Theory Instructor / ICT Support Technician

2025 – 2026

Ultimate Driving & Computer College, Nairobi

- Taught computer fundamentals, programming, Linux OS, graphics design, internet & email usage to 30+ students per term with a 95% pass rate.
- Diagnosed PC/laptop faults, installed Windows/Linux dual boot environments, set up printers, and eliminated malware for 50+ users monthly.
- Configured LAN, routers, switches, and VLAN layouts to maintain stable internet connectivity for a college lab with 40+ workstations.
- Provided basic & advanced ICT support, trained 5 junior staff members, and documented comprehensive system troubleshooting SOPs.
- Managed an active ICT equipment inventory valued at Ksh 2 Million and performed weekly data backups with zero data loss incidents.

Veew Distributors Limited, Nairobi

- Utilized company Distribution Management System (DMS) frameworks to record transactions, align system sales log metrics, and track product data entries.
- Managed and audited physical inventory flows worth Ksh 500,000 daily with a 100% distribution accuracy record.
- Demonstrated absolute reliability, discipline, sharp analytical communication, and high attention to detail in fast-paced collaborative operations.

DIGITAL PORTFOLIO & TECHNICAL PROJECTS

ShopMart & E-Commerce Store (timokama.github.io/e-commerce.html)

- Designed a full-stack online marketplace with product catalogs, shopping cart flows, local storage synchronization, and administrative dashboards.
- Built automated consumer conversion paths by integrating **WhatsApp Business API** notification triggers and location-based delivery forms to maximize transaction engagement.
- Optimized web structures for speed, mobile-first layouts, and professional metadata index visibility.
- **Tech Stack:** React, Node.js, Express, PostgreSQL, HTML5, CSS3.

School Management System

- Engineered an enterprise system tracking student records, financial ledger states, and client reports, used daily by an institution serving 200+ individuals and 15 staff members.
- **Tech Stack:** Java, PostgreSQL, JDBC, Database Optimization.

Restaurant Geolocation QR Menu System (timokama.github.io/restaurant-menu.html)

- Created a digital storefront featuring instant interactive category filtering, dark/light visual modes, and QR-code enabled access routes for enhanced client visibility.
- **Tech Stack:** Vanilla JavaScript, LocalStorage API, CSS3.
